

CLAIMS

1. A baking oven comprising a holding part (12) which is horizontally guided inside a baking chamber (2) for receiving and holding a baking rack (24) which can be displaced between a baking position inside the baking chamber (2) and a removed position located, at least in part, in front thereof, characterised in that the holding part (12) comprises two retaining elements (13) which are arranged on opposing side walls (6) and at a distance from a top (10) or a bottom (8) of the baking chamber (2).
2. The baking oven according to claim 1, characterised in that the retaining element (13) is guided by a carriage (16).
3. The baking oven according to claim 2, characterised in that the displaceable carriage (16) is arranged on a side wall (6) of the baking chamber (2) respectively in a middle height region.
4. The baking oven according to claim 2 or claim 3, characterised in that the retaining element (13) comprises a hooked rail (14) which is fixed to the carriage (16).
5. The baking oven according to claim 4, characterised in that the hooked rails (14) are coupled to one another by means of a cross bracing (26).
6. The baking oven according to any one of claims 2 to 5, characterised by a locating position of the carriage (16) at least in the removed position.

7. The baking oven according to any one of claims 2 to 6, characterised by a roller-mounted carriage (16).
